## Custom Fabricated Liners

Baldwin International can eliminate the headaches and downtime caused by poor, inconsistent service and generic steel failure, providing you with full-service supply of your custom liners developed from your drawings using the finest alloy steels in the industry.

For over 50 years, Baldwin International has specialized in developing a range of services designed to meet the needs of efficient industry. Our experienced team is highly trained to provide applications that work and last, saving you the frustration and improving your bottom line.

You can choose from a variety of high quality Baldwin International special-chemistry alloys based on your specifications, or you can let our experts choose for you, based on your applications. We maintain a large stock of our exceptional plate product line, including Mangabrazo, E-Z Braze, Tuffbraze and Tuffbraze 500.

Whether you require simple fabrication pieces or generation of parts from intensive drawings, let Baldwin do the work. We employ a wide array of machining processes and utilize the latest technology to ensure quality service with every job.

If you are tired of poor service, weak steel performance and multiple vendors dedicated to the same job, look to reputable full-service expertise of Baldwin International. We work closely with the largest, most successful industrial firms in the world for good reason. With the highest quality steel and extensive experience we will do your job well, and do your job right. If you think we may be able to assist, please contact your local sales representative or the sales department at the main office. Let our professional staff make your job easier and your success greater.
